Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In claims 11-15, the claimed "program code" claimed as computer listings per se, i.e., the descriptions or expressions of the programs, is not physical "things." The claimed "program code" taken as a whole is directed to a mere program listing, i.e., to only its description or expression, it is descriptive material per se, and hence nonstatutory. Furthermore, the claimed "program code embodied in a storage or **transmission medium** (emphasis added)" recites nothing but signals, or the physical characteristics of a form of energy, such as frequency, voltage, or the strength of a magnetic field, define energy or magnetism, per se, and as such are nonstatutory natural phenomena. O'Reilly, 56 U.S. (15 How.) at 112-14.

Claims 1-10 claim a method and apparatus in which each step/means recites the functions of the instructions of the program in claims 11-15. The claims 1-10 preempt an Abstract Idea cover a 35 USC 101 Judicial Exception. In determining whether the claim is for a "practical application," the focus is not on whether the steps taken to achieve a particular result are useful, tangible, and concrete, but rather the final result is "useful, tangible, and concrete." The claimed method/apparatus recites only the executing or running a program and has no final "practical application" after the execution of the program.

Claims 1-15 are objected to because of the following informalities: In claims 1, 6, and 11 "[list commands]" (line 5) is unclear as a deleted part. Appropriate correction is required.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The "newList [list commands] endList command sequence" or the "callList" command has not been specifically described for its structure or function.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "list commands" (line 4) is unclear as to its proper antecedent basis as whether it indicates "list commands" in line 1; "callList command" (line 14) is unclear as

to its proper antecedent basis as whether it indicates "callList command" in line 10; "a display list" (line 8) is unclear as whether it relates to "display list" commands in line 1.

In claim 6, "list commands" (line 4) is unclear as to its proper antecedent basis as whether it indicates "list commands" in line 1; "callList command" (line 15) is unclear as to its proper antecedent basis as whether it indicates "callList command" in line 11; "a display list" (line 9) is unclear as whether it relates to "display list" commands in line 1.

In claim 11, "list commands" (line 6) is unclear as to its proper antecedent basis as whether it indicates "list commands" in line 3; "callList command" (line 16) is unclear as to its proper antecedent basis as whether it indicates "callList command" in line 12; "a display list" (line 10) is unclear as whether it relates to "display list" commands in line 3.
